

Security and Safety Preparations

For Superyacht Operations in the Mediterranean Sea

2017 Datasheet

This comprehensive 1-day workshop gives valuable guidelines on the safe and secure operations of your superyacht. This workshop is conducted by MSS consultants. These consultants, as former senior naval officers, have successfully completed the most demanding military courses, have many years of military experience and have commanded warships in the most challenging situations. MSS consultants have advised owners of commercial vessels and yachts in preparations for and execution of anti-piracy, anti-robbery and anti-kidnapping operations.

Risk Classification

Security and Safety Risk Definition, Risk Formulas, Threat and Vulnerability Assessment, Likelihood, Consequences and Impact, Countermeasures and Risk Prioritization.

Countermeasures to Mediterranean Specific Threats

Identification of Specific Threats, Graduate Response Planning Model, Naval Style Countermeasures, Drills, Training, Exercises and Operations.

Mediterranean Specific Safety Risks

Identification of Specific Safety Risks, Naval Style Countermeasures, Drills, Training, Exercises and Operations.
